

MESSRING achieves TISAX® certification

TISAX® Level 3 guarantees highest data security in the automotive sector

Munich, November 06, 2023 - MESSRING, leading solution provider of crash test systems and test tools for the validation of active vehicle safety systems for the automotive industry, is pleased to announce the successful certification according to TISAX® (Trusted Information Security Assessment Exchange). Achieving the highest level 3 underlines MESSRING's commitment to the highest standards of data security and privacy.

Trusted partner of the automotive industry

TISAX® certification is an internationally recognized standard for information security in the automotive industry. It was developed to ensure that companies in this industry comply with the strictest security standards and practices. The successful certification proves that MESSRING meets the strict requirements for the protection of its customers' sensitive data and is therefore a trustworthy partner for the automotive industry.

The certification involves an audit of a company's information security measures, including its infrastructure, processes, and data protection practices. MESSRING has passed this demanding audit process and successfully demonstrated its ability to handle data securely.

Dierk Arp, CEO of MESSRING states: "The successful TISAX® certification is proof of our continued commitment to the highest standards not only in the area safer mobility, but also in data security. Data protection is of paramount importance as digital connectivity plays an increasingly important role in the automotive sector. We are proud to offer our customers this security."

ENX portal provides a platform for exchange

More and more automotive manufacturers, suppliers and service providers require a successful TISAX® assessment as a mandatory condition for their tenders.

The fact that MESSRING has successfully completed the audit is made transparent to companies in the industry by the corresponding entries in the ENX Portal under the assessment ID AC22MV-3. The ENX Portal enables the exchange of audit results with existing and potential business partners. Access to the results in the [ENX Portal](#) is reserved for TISAX® participants. TISAX® and TISAX® results are not intended for the general public.

About MESSRING:

MESSRING GmbH is the world market leader for crash test technology. Based in the southwest of Munich, the mid-sized company's product offerings range from the realization of large, turnkey and multifunctional crash test facilities to the delivery of compact crash simulation test systems. In close cooperation with automotive engineers and manufacturers, MESSRING develops application specific solutions that enable the automotive industry to test their active and passive vehicle safety systems. With more than 170 employees and over 140 crash and sled test facilities installed worldwide, MESSRING has been contributing to making traffic and transportation safer for over 50 years. As a pioneer in the field of passive safety, MESSRING has set itself the goal of also playing a leading role in active safety. For this reason, MESSRING Active Safety GmbH was founded in 2018, whose core competence is in the development of test systems for driver assistance systems and autonomous vehicles.
